- Successfully recruited and onboarded a skilled team of 3 mobile developers, 2 web developers, and 1 backend developer with a quality assurance tester and UI/UX designer within a challenging timeframe of 2 weeks.
- Directed the end-to-end development of the mobile and web application, leading a cross-functional team of 6 developers, designer, and QA specialist.
- Managed and coordinated the development process, ensuring timely delivery and adherence to the client's specifications, timeframe and budget.
- Contributed to the building of the app's web dashboard and as well as the start and completion of the landing page of the app as a whole.

PROFESSIONAL SUMMARY

As a front-end developer, I specialize in creating immersive user experiences with technologies like React.js, Next Js, and Typescript. With three years of experience, I've delivered products to clients globally, from startups to corporations, and individuals. Eager to adapt to new technologies, I strive to create digital products that are intuitive and visually captivating. My goal when joining any organization is to learn, grow, collaborate and enjoy the process of building or improving a product that clients and users will enjoy.

TECHNICAL SKILLS

Javascript, React.js, Next Js, Typescript, Redux, Context API, Html / Css, Git / GitHub, Npm / Yarn, Netlify / Vercel, Tailwind

KEY COMPETENCIES

User-centered design, Attention to detail, Team collaboration, Critical thinking skills, Adaptability and continuous learning, Project management, Leadership and team management, Community management and engagement.
